

After (text.kerning_factor = 0)

A plot with a white background and a black border. The x-axis is at the bottom, ranging from 0.0 to 1.0 with major ticks every 0.2. The y-axis is on the left, ranging from 0.0 to 1.0 with major ticks every 0.2. Four lines of text are displayed, each centered vertically on its respective y-axis tick. The text is in a large, bold, black sans-serif font. The first line is 'BRAVO' at y=1.0. The second line is 'AWKWARD' at y=0.6. The third line is 'VAT' at y=0.4. The fourth line is 'W.Test' at y=0.2. The text 'W.Test' is the only one containing a period. The plot demonstrates the effect of setting the kerning factor to 0, where the spacing between characters is uniform regardless of the specific letter pairs.

BRAVO

AWKWARD

VAT

W.Test
